

**STRUCTURED DECISION MAKING (A Rapid Song Prototype)**  
**By Brant N. Miller**

We thought we knew adelgids, we were good with climate change  
Experts on the cormorants, the game and the non-game  
But our fundamental objectives were just a little hazy  
So they sent us to NCTC to P.R.O.A.C.T.

Chorus 1:

Structured Decision Makin', so much here to decide  
Should I go for seconds of the pork chops and the rice?  
And how to save the wildlife while keepin' fists from shakin'  
We'll build a model for it all at Structured Decision Makin'

The first day we all racked our brains for good alternative actions  
By five-o'clock the best one seemed to be to drink a cold one  
But on Day 2 things started to gel for our first prototype  
With our coaches keepin' us in line and observers keepin' quiet

Chorus 2:

Structured Decision Makin', so much here to decide  
Should I have the cheesecake or the pecan pie?  
And how to save the wildlife while keepin' fists from shakin'  
We'll build a model for it all at Structured Decision Makin'

So now we're here to give our last report to the group  
Our team is tighter than a tick and we're all in the loop  
We'll leave a little heavier but wiser than we were  
Ready to tackle challenges of menus, fins and fur

Chorus 2:

Structured Decision Makin', so much here to decide  
Should I go on a diet, or should I exercise?  
And how to save the wildlife while keepin' fists from shakin'  
We've built a model for it all at Structured Decision Makin'  
It took a lot of beer to make it through Structured Decision Makin'
