## General Info and Resources (FWS Internal)

*The National Geospatial and Data Services Team maintains a SharePoint site to support all of your geospatial needs:*

Welcome to the USFWS!

Geospatial data and services are critical elements needed to meet the mission of the U.S. Fish and Wildlife Service (USFWS). Geographic Information Systems (GIS), Global Positioning Systems (GPS), and remote sensing are the primary elements which fall under the geospatial data and services umbrella. The FWS maintains an internal sharepoint site to improve communication and coordination within the Service and serves as the main resource for anything and everything related to a geospatial user's needs.

### Contacts

The FWS GIS Steering Committee mission is to improve the effectiveness and cost efficiency of the use of GIS and related technologies to support accomplishment of the Service's mission through the FWS Geospatial Services Strategic Plan Action Items. The committee membership includes regional and program representatives. Additional groups, teams and committees support programs and regions.
