

Advanced Topics in Conservation Genetics

A Webinar Series

...keeping biologists and managers up to date on the latest techniques and concepts in conservation genetics.

Webinar Schedule:

June 26, 2014: A validation of parentage-based tagging using hatchery steelhead in the Snake River basin.
Craig Steele, Pacific States Marine Fisheries Commission.

July 16, 2014: Forensic genetic identification of sturgeon caviars traveling in world trade.
Steve Fain, USFWS.

September 2, 2014: Introduced populations as genetic reservoirs for imperiled species: A case study of the Arkansas River Shiner.
Megan J. Osborne, University of New Mexico.

September 16, 2014: Are captive tortoises a reservoir for conservation?
Taylor Edwards, University of Arizona.

October 15, 2014: Gene-associated markers provide tools for tackling illegal fishing and false eco-certification.
Robin Waples, NOAA.

November 18, 2014: Reduced total genetic diversity following translocations? A metapopulation approach.
Mark E. Hauber, City University of New York
